THE COMPANY WE KEEP

We are proud of the many projects we have participated in over the past 60 years.

Crownlite is as an innovative prime manufacturer focusing on quality commercial, industrial, and institutional architectural lighting systems for over 60 years.

Our involvement has varied from in-depth engineering evaluation, computerized modeling, optical, lighting, and custom fixture design, to bidding on customer supplied specifications and bills of material.

We bring a special awareness of design, product, and production that will make a critical difference in the performance of your lighting project.

When you specify Crownlite, whether for sophisticated high quality specification grade or standard product, you are engaging as complete a package of services as you desire: design, prototyping, engineering, manufacturing, instruction and installation guides, field training, drop shipment, and warehousing.

And, we only select vendors who are equally expert in their respective specialty areas: Extrusions, Automated CNC machining, Sheet metal, Finishing (both powder coating and anodizing), electrical and optical components, Electro-mechanical assembly, packaging, etc.

We offer a single organization able to responsibly support your project from initial concept and design through final installation and field follow-up; UL Listed/Union made IBEW. We look forward to working with you.

For a listing of a few of the many architectural projects we have participated in, please see page two of this article.
